**REISSUE DECLARATION UNDER 37 C.F.R. 1.175
AND POWER OF ATTORNEY**

Honorable Commissioner of Patents and Trademarks
Washington, D.C. 20231

Sir:

We, Daniel F. Daly, residing at 194 Barn Hill Road, Monroe, Connecticut, John Henits, residing at 12 Country Way, Bethel, Connecticut, Salvatore J. Morlando, residing at 15 Jamestown Road, Easton, Connecticut, Robert B. Swick residing at 168 Margherita Lawn, Stratford, Connecticut, Keith K. W. Leung, residing at 106 Longview Road, Monroe, Connecticut, and Constantine P. Messologitis, residing at 106 West Rutland Road, Milford, Connecticut, citizens of the United States; declare that we have read the foregoing specification and we verily believe ourselves to be the original, first, and joint inventors of the invention entitled MODULAR DIGITAL RECORDING LOGGER, described and claimed in the attached specification for reissue of United States Letters Patent No. 5,819,005 (the "'005 patent"), which issued October 6, 1998 from application Serial No. 08/623,671 filed March 29, 1996, and we further declare that:

We have reviewed and understand the contents of the above-identified application, as presented both in the original patent and in this reissue application, including the specification and claims as amended by the amendment filed herewith;

We do not know and do not believe that our invention was ever known or used in the United States before the date of our invention thereof;

09674422250

The invention described and claimed in our patent specification has not been patented or made the subject of an inventor's certificate in any country foreign to the United States on an application filed by us or our legal representatives or assigns more than twelve months prior to March 29, 1996, the filing date of our application Serial No. 08/623,671.

We acknowledge the duty to disclose information which is material to the patentability of the claims of this application in accordance with Title 37, Code of Federal Regulations, Section 1.56.

We verily believe the '005 patent to be, through error and without any deceptive intention, partly inoperative by reason of our claiming less than we had a right to claim in the '005 patent. Specifically, one reason why the '005 patent is believed to be partly inoperative is that the patent claims include additional features directed to specific embodiments. In particular, the recitation in independent claims 1, 11, 22 and 24 that the modular digital recording logger is for "recording two-way conversation" is an error, which may limit those claims to a specific embodiment for recording conversations. The recorded voice signals of the invention disclosed in the specification need not correspond to any "conversation." Another error is the recitation in independent claims 11, 22 and 24 that each logger in a network of loggers have a hard disk drive "to store and reproduce" compressed voice data, which may limit those claims to a specific preferred embodiment where each logger both stores and reproduces stored data. In a network of loggers as disclosed in the specification, each individual logger need not be capable of both storing data and reproducing stored data.

We did not discover these and other errors until reviewing the '005 patent after issuance. Upon determining the inadvertent mistakes in failing to claim the full scope of the invention, we took prompt steps to instruct our attorneys to prepare and file this reissue application. We believe that the original claims of the application, as amended, together with the new claims added by this reissue application, now correct the errors and adequately cover the present invention.

All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the applicants.

The amended and new claims submitted herewith remedy the errors in the issued claims.
